TECH ARSENAL

Systems & Infra

Linux · Docker · Deployment

Networking

OpenWrt · Reverse Proxy · DNS · VPN

Web Dev

React / Next.js · TypeScript · Node.js · Django · Tailwind CSS

Databases

PostgreSQL · SQLite

LANGUAGES

Spanish
Native

English
Intermediate (~50%)

Profile

I work with software, networking, and servers, driven by a desire to understand how things work and to push systems to the point where they truly make sense. Pragmatic and results-oriented, with a focus on optimization. I seek maximum performance with the least amount of resources, constantly refining until real quality is achieved. My natural focus is on backend, infrastructure, and networks.

Experience & Education

Software Engineering Student

2024 - 2028

Universidad Cooperativa De Colombia

Acquiring solid fundamentals in algorithms, databases, and architecture, supplementing theory with a self-driven interest in infrastructure and networks.

Key Projects

UniShop

github.com/Whatfck/UniShop

E-commerce platform designed for the university community, facilitating the purchase and sale of products among students.

Web Player

github.com/Whatfck/reproductor-web

Modern audio playback application with an intuitive interface, playlist support, and advanced controls.

Multilingual Portfolio

github.com/Whatfck/portafolio

Personal portfolio built with Next.js to showcase professional profile, experience, skills, and projects with dynamic localization and brutalist design.

References

> *"Daniel proved to be a serious, responsible professional committed to his work. He stood out for his analytical skills, his clarity in communicating information, and his focus on providing useful solutions."*
